## EDUCATION

---

### Fepi

*Bachelor of Technology in Systems Analysis and Development*

Itajubá, MG

*January 2022 – July 2024*

### CEP

*Technical Degree in Information Technology*

Brazópolis, MG

*January 2019 – December 2021*

## EXPERIENCE

---

### Systems Development Intern

*APTIV*

April 2023 – July 2024

*Paraisópolis, MG*

- Technologies: HTML, CSS, Bootstrap, Javascript, JQuery, Ajax, SQL Server
- Gather and analyze requirements in communication with the team to structure the project.
- Develop Front-end screens using the Bootstrap framework.
- Develop the Back-end of applications using CRUD in the database.

## PROJECTS

---

### Warehouse Monitoring | *Javascript, JQuery, SQL Server, Bootstrap*

2023 – 2024

- An interactive dashboard to monitor operators' route progress, including the number of boxes collected and workload calculation.
- Upon registering item allocations by the operator, an email was automatically sent to the purchasing team for material prioritization and to automatically lower inventory when the material was reallocated.
- Utilized the ECharts and Google Charts libraries to generate charts for better data visualization.
